

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

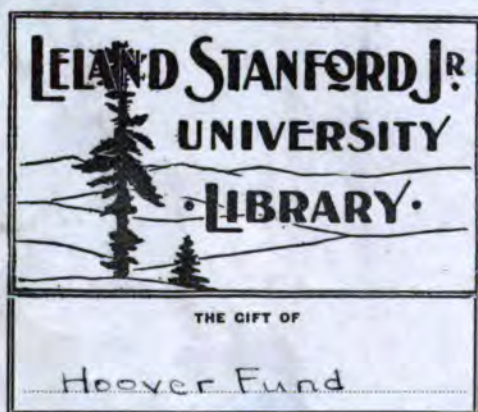

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

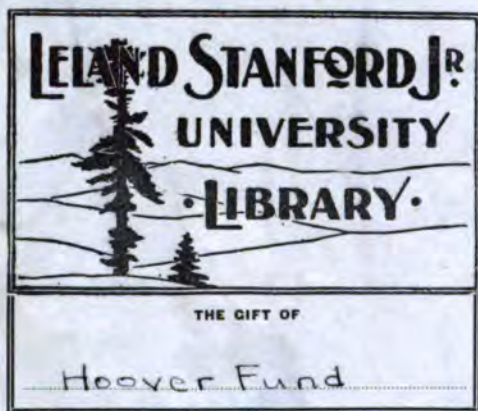

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

V. A SUMMARY OF THE TOTAL IMPORTS AND EXPORTS OF GOLD AND SILVER

INTRODUCTION TO VOLUME I.

Outline of Tables included.—In the detailed Tables contained in this Volume the imports and exports are classified by articles, the imports and exports of each article being further subdivided according to the countries from which imported or to which exported. Particulars are given throughout of the values and, where ascertained, of the quantities of imports and exports for each of the last five years 1903 to 1907. In the abstract Tables, which are prefixed to the detailed Tables, the same information is given with regard to the total imports and exports of each article, the distinction of countries of import and export being omitted. Finally in the Summary Statements, which are placed at the commencement of the Volume, an account is given of the value of the imports and exports of each of the principal groups of articles classified as "Food, Drink and Tobacco," "Raw Materials and Articles Mainly Unmanufactured," "Articles Wholly or Mainly Manufactured," and "Miscellaneous and Unclassified"; imports from and exports to Foreign Countries being distinguished from those from and to British Possessions and Protectorates. A statement is appended to these Summary Tables showing what articles are included in each of these groups, whilst in the detailed Tables a letter and number is added in brackets after the name of each article showing how that article is classified for the purpose of the Summary Statements.

At the end of the detailed Table relating to imports is appended a special Table showing the rate of duty levied on each dutiable article, the quantity of each such article "Entered for Home Consumption," *i.e.*, on which duty was paid, in each of the last five years, and the gross amount of duty received in respect of each article. In this Statement the country from which the articles were imported is not in general shown. A distinction is, however, made in the case of Tea, between British East Indian, Ceylon, Chinese, and other Tea, and in the case of Wine a Statement is appended showing the quantity entered for Consumption, of Wine imported from France, Portugal, and Spain respectively.

Imports are subdivided into articles free of duty and articles subject to duty; exports into articles the Produce and Manufacture of the United Kingdom, and re-exports of Foreign and Colonial Merchandise previously imported, the latter being again subdivided according to whether free of duty or subject to duty on importation.

In the abstract Tables the imports of articles subject to duty and the exports of Foreign and Colonial articles subject to duty on importation are not separately specified. The particulars relating to such articles are, however, printed in italics.

Scope of the Tables.—The Tables relating to *imports* show in every case the values and in most cases the quantities of the general imports from all sources into the United Kingdom, whether imported for immediate consumption or for re-exportation or taken into warehouse. Goods merely in transit, whether on through Bill of Lading or otherwise, are included except goods (dutiable or otherwise) transhipped under bond, *i.e.*, goods removed from a ship in one port and carried under bond to another port for re-shipment, or removed under the same conditions from one ship to another in the same port. A separate account is kept of transshipments under bond, and particulars with regard thereto are given in the second Volume of the "Annual Statement."

Coin and Bullion are excluded throughout from the general Tables of imports and exports which relate to merchandise only, but separate Tables are given at the end of this Volume showing the imports and exports of Coin and Bullion by countries.

The following classes of goods arriving in this country are not included in the import statistics :—

- (1) Personal luggage, including parcels brought by passengers for private use, so long as such parcels do not contain dutiable goods. Dutiable goods contained in passengers' parcels are included in the statistics.
 - (2) Fresh fish and shell fish of British taking, landed from British ships arriving direct from the fishing grounds.
 - (3) Ships' Stores, Military and Naval Stores on board Government Vessels, bunker coal and ballast.
 - (4) Mats, sacks, cases, bottles, etc., used as the packages of imported goods.
 - (5) Goods directly imported by Ambassadors and Ministers accredited to this Kingdom
 - (6) Old Vessels bought from foreigners.
- New Vessels, including barges, boats and small craft, have been included under a separate heading since 1903, prior to which year they were included as iron or steel manufactures, if of iron or steel, and as wood manufactures or manufactured goods unenumerated, if of wood.

Such diamonds and other precious stones as are declared to the Customs on importation have been included in the statistics, but diamonds only from March, 1901. The great bulk of diamonds and other precious stones imported is, however, not so declared, and the quantity included in the Tables represents therefore only a small fraction of the actual imports. Some particulars of the diamonds sent from South Africa to the United Kingdom are given in a footnote on pages 4^c and 47.

As already stated exports are divided into exports of the produce or manufacture of the United Kingdom, i.e., "Special Exports*," and Exports of Foreign and Colonial Merchandise, i.e., "Re exports." These two taken together may be considered as constituting the General Exports of the United Kingdom. As in the case of Imports, the Exports of Foreign and Colonial Merchandise include goods in transit except those transhipped under bond.

New ships and boats (British built) sold to foreigners which have not been registered as British or which have been registered only for purposes of delivery or transfer abroad are now included in the Tables relating to Exports of the Produce or Manufactures of the United Kingdom. Old Vessels sold to foreigners are, however, excluded. Other articles excluded from the statistics are goods exported by H.M. Government, and those corresponding to the headings (1), (3), and (4), stated above with regard to exclusions from the import statistics. The observations with regard to diamonds imported also apply in the case of diamonds exported, except that no record is available which would enable an estimate to be formed of the real value exported.

Although shipments of bunker coal are not included in the general Tables an account is kept of the total quantity of coal sent out of the country in the bunkers of ships engaged in the foreign trade, and information on the subject is given on pages 66 and 67.

Under the head of Exports of Foreign and Colonial Merchandise are included not only such goods as are in transit through the country on a through Bill of Lading (except goods transhipped under bond) but also all goods which have not had their value sensibly modified by any process of refining or manufacture whether they have remained in warehouse or otherwise during their stay in the United Kingdom. Goods which have merely been sorted, repacked, or blended are included. Goods which have undergone any other process, however slight, are included under the head of Exports of the Produce or Manufacture of the United Kingdom, as are also all goods exported by Parcel Post.

The separate Table of dutiable articles entered for Home Consumption gives an account of all such articles on which duty has been paid during the year, whether imported directly for consumption or removed from warehouse. Except for such dutiable articles no account is kept directly representing the "Special Imports" into the United Kingdom. It is clear, however, that a rough approximation to the value of such "Special Imports," but without distinction of countries from which derived, may be obtained by deducting the value of the Exports of Foreign and Colonial Merchandise from the value of the Imports.†

Method of Ascertainment of Quantities and Values of Imports and Exports.—The statements of both quantities and values are based on the declarations of importers and exporters as subsequently checked by the Customs officials. Quantities are not recorded in every case, but where recorded they are generally recorded by weight. Liquids are, however, in general, entered by bulk, as are also timber, onions, and certain seeds; a few articles are entered by number only; floorcloth, linoleum, etc., by square yards; piece goods, for the most part, by linear yards. Spirits are entered by proof gallons, i.e., by the number of gallons of proof spirit they contain. Where goods are entered by weight the quantities given represent the net weight exclusive of packages, sacks, casks, tins, bottles, etc., in which they may be contained, or of reels, etc., on which they may be wound.

In the case of imports the values given are intended to represent their cost, plus insurance and freight to the place of landing, or when consigned for sale the latest sale value of the goods. In the case of dutiable articles the values are given exclusive of the amount of the duty. In the case of exports the values are intended to represent the cost of the goods including all charges thereon up to the time of their delivery on board ship. The amount of the export duty on coal, coke, cinders, culm, and patent fuel is included in the values of the exports for the period in which this export duty was levied, namely, from 19th April, 1901, to 31st October, 1906. In other words the values of imports are given "c.i.f." and the values of exports "f.o.b."

Countries to which Imports and Exports are credited.—Throughout the Tables in this Volume Imports are generally classified as received from the countries whence they were shipped direct to the United Kingdom. In the majority of cases the country of shipment is also the country of origin; but it should be borne in mind that this is not always the case, and that to a greater or smaller extent merchandise originating in one country is credited in these Tables to other countries at whose ports it has been transhipped, or through whose territories it has been conveyed by rail for shipment to the United Kingdom. In particular, it will be noticed that imports from Switzerland and Bolivia, which have no sea-board, are never credited to these countries.

This general principle has, however, been departed from in two principal cases:—

- (1) Large quantities of goods from Japan, China, and other Eastern Countries are transhipped at Colombo. Other Eastern goods are transhipped at Marseilles. Goods from Chile and Peru are largely transhipped at Colon on the Isthmus of Panama. In all these cases the goods are, so far as possible, credited to the country of original shipment instead of to Ceylon, France or the Republic of Panama, as the case may be.

* By the term "Special Exports," is meant the exports of the produce of the United Kingdom, and all goods manufactured in the United Kingdom whether from home or foreign produce. Foreign and Colonial goods exported in the same form in which they were imported are not included under this title.

† By the term "Special Imports," is meant all imports of Foreign and Colonial produce used or consumed in the United Kingdom, or worked up in the United Kingdom and then exported. It does not include imports of Foreign and Colonial goods afterwards exported without change of form.

- (2.) A considerable amount of Canadian produce finds its way to the United Kingdom *via* the ports of the United States in winter, when many Canadian ports are closed by ice. To some extent produce from the United States is sent to the United Kingdom *via* Canadian ports in the summer. Where, in such cases, the official documents enable a distinction to be drawn between Canadian and United States produce, it is credited to the true country of origin. But in many cases, such a distinction cannot be made, so that in using the statistics it should be remembered that a certain amount of the trade of Canada with this country, especially in winter, is unavoidably included under the heading "United States."

Exports are, as a rule, credited in the Tables to the country of ultimate destination as declared by the exporters in their entries. Exports, however, to Switzerland and Bolivia, which possess no sea-board, are credited to the country in which the port of discharge is situated.

Particulars have been specially collected since 1st January, 1904, with regard to the countries of consignment of all imported goods and the countries of ultimate destination of all exported goods. Information on this subject will be found in the Supplements to the Annual Statements.

Arrangement of Articles.—The general principle of the arrangement of the Articles is alphabetical. This statement is, however, subject to the qualification that in several cases articles are grouped together under a general heading, wheat for instance being classed with other cereals under corn, and pig iron under metals.

An index of Articles showing references to Imports and Exports, and the Home Consumption of dutiable goods, is given on pages 683 to 691.

Imports by Parcel Post, when not subject to duty, are not classified according to their nature, but are separately recorded at the end of the Tables relating to imports, and are entered by number of parcels and value. Dutiable goods imported by Parcel Post are grouped, according to their nature, with similar goods imported in the ordinary course. Exports by Parcel Post are treated in the same way as imports of free goods by Parcel Post. All such exports are treated as being of the Produce and Manufacture of the United Kingdom.

Unenumerated goods are divided into "Unmanufactured" and "Manufactured" and are placed in the Tables of imports and exports after all other goods recorded alphabetically and before Parcel Post. They are entered by value only. Statements showing the total value of the principal articles included under each of these heads which were imported and exported (both British and Foreign) in 1907 only, and without distinction of countries of import or export, are given on pages 58, 59, 90, 91, 128 and 129.
